

Amateur Radio Technician Class Licensing Course

Presented by The East Bay Amateur
Radio Club, Inc.

ARRL *The national association for
AMATEUR RADIO*

Introductions

- State your name and a little about yourself.
- Why are you taking this course?
- What do you know about ham radio?
- What expectations do you have for yourself and your instructors?

My Expectations

Class will start and end on time.

Instructor will be prepared.

Students will read assigned material.

Active participation during class discussions.

Course Outline

- Welcome to Amateur Radio
- Radio & electronics fundamentals
- Operating your station equipment
- Communicating with other hams
- Licensing regulations
- Operating regulations
- Radio safety
- Test preparation and review

Our Goals

Obtain an Amateur Radio License by:

- Knowing the fundamentals.
- Passing the Exam.

Operate an Amateur Radio Station.

- Communicating with other stations.
- Legally and safely

Steps to Obtaining Your License

- Study the material in the *Ham Radio License Manual*.
- Review the questions in the back of the book
- Take interactive practice exams.
- Pass a proctored multiple choice test administered by volunteer examiners by answering 26 out of 35 questions correctly.
- Submit an application to the Federal Communications Commission.

So Let's Begin

Tonight we will talk about Amateur Radio and radio fundamentals. More detail will follow in the weeks to come.

Reading assignment:

- Introduction, Chapter 1, and Chapter 2 – will be covered tonight.
- Chapter 3 – will be covered next week.

What is Amateur Radio?

Amateur Radio is a ***personal radio service*** authorized by the Federal Communications Commission (FCC).

- To encourage the advancement of the art and science of radio.
- To promote the development of an emergency communication capability to assist communities when needed.
- To develop a pool of trained radio operators.
- To promote international good will by connecting private citizens in countries around the globe.
